Nagercoil TamilNadu

Profile Summary :

Python Full Stack Developer with hands-on experience in ML model integration using Flask and Flutter. Skilled in building end-to-end applications combining backend APIs with intelligent ML solutions.

Technical Skills :

Programming: Python, Java, SQL

Web & Frontend: HTML, CSS, React, Flutter

Web & Backend: Flask, FastAPI, REST APIs

Machine Learning: Scikit-learn, CNN basics, LSTM basics

AI Tools: Hugging Face Transformers, OpenCV, N8N, Hopscotch

Databases & Tools: MySQL, Git, GitHub, Jupyter Notebook

Design Tools: Figma

Projects:

Sign Language Converter

Built an end-to-end sign language recognition system using Flutter frontend and Flask backend
Fine-tuned a pre-trained Hugging Face vision model for gesture classification
Integrated real-time camera input and API-based inference
Stored prediction history and metadata using MySQL

Voice2Gov – AI-Based Civic Grievance Management System

Developed a full-stack AI-powered complaint management platform using FastAPI, React Native/Expo, MongoDB, and Socket.IO with features like complaint classification, department routing, JWT authentication, real-time notifications, and speech/image processing integration.

Hospital Token Booking System

Developed a real-time token booking system using React, Flask, and Socket.IO
Integrated an ML model to predict waiting time based on historical token data

Paper Publications

Published a research paper on a smart home management system enabling centralized control and real-time monitoring of IoT-based home devices.

The system focuses on improving energy efficiency, security, and user convenience.

Education

Python FullStack

Codsoft chennai

Bachelor of Information Technology

R.M.K Engineering College,

Chennai

CGPA: 8.43 / 10.0

Certifications:

TechA AWS Solution Architect Certification

MongoDB Basics for Students

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
